DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a reflector, are classified in class 362, subclass 296.
 - II. Claims 10-15, drawn to a manufacturing method for the reflector, classified in class 264, subclass 1.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions for a light source including a reflector in class 362/296 (Claims 1-9) and a manufacturing method for a reflector in class 264/1.1 (Claims 10-15) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions deal with a light source that has a reflector (class 362) and a method of making that reflector (class 264). It should be further noted that class 362 has no subclass for methods of manufacturing.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2875

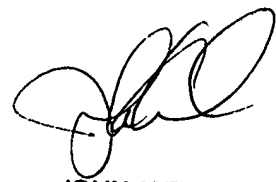

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
